

Pils 13 “delta” (canned)

We believe that canned beer is better for the beer and the environment. We can also say that we are “pioneers” in the field of canned craft beer in Belgium. Given that we have to brew this beer based on the same recipe as the other 13, but with another installation and sell it in cans and therefore not in bottles, there may be a difference in taste. The “Δ” (delta) symbol stands for the “change” in chemistry. We brew our Pils 13 Delta at the PROEF Brewery in Lochristi. Available in 33cl cans, in a 24-pack box.

Appearance

Clear, pale, blonde beer with creamy, irregular head.

Aromas

Malt and notes of grain, slightly grassy with soft hints of citric.

Taste

First you taste the malt, then a slightly sweet tone, but then the hoppy bitterness hits your taste buds. Just like we are used to with 13.
